**RE: Additional Written Comments To The FCC's Localism Task Force
(Docket RM-10803)**

Dear FCC Commissioners and Staff:

The MICHIGAN MUSIC IS WORLD CLASS! CAMPAIGN (MMWC) hereby submits Additional Written Comments to the FCC's Localism Task Force.

These Additional Written Comments take the form of the complete text of a Report on openings for Low Power Radio stations, on the AM and FM Bands, in Metropolitan Detroit. The Report was prepared for MMWC by REC NETWORKS of Tempe, Arizona: a non-profit provider of information and analytical services to the nation's Low Power Radio community. It was released on December 21, 2003.

The REC NETWORKS Report concludes that there are no openings for Low Power FM stations in Metropolitan Detroit unless *both* the third adjacent channel spacing requirement *and* the second adjacent channel spacing requirement are removed. On The Other Hand, the same Report estimates that establishment of a Low Power AM Radio Service -- as proposed in the recent Petition For Rulemaking by Fred Baumgartner, C.P.B.E. of Colorado -- would offer opportunity for 4 new, locally based and locally oriented Low Power Radio stations in Metropolitan Detroit.

Our basic Written Comments, filed earlier today, discuss the REC NETWORKS Report and note that its URL is <http://www.recnet.com/fcc/LPFM-detroit.pdf> Upon reflection, however, MMWC has decided that the complete Report should be placed in Docket RM-10803 as Additional Written Comments by our organization.

Sincerely,

Tom Ness
